

UDSM Connected Intelligence Initiative

Comprehensive Interview Questions for the Dean of Students

Purpose: These questions support in-depth requirement gathering for the UDSM Connected Intelligence Initiative mobile application. They cover communication, student welfare, safety, engagement, governance, and system adoption.

A. Communication & Information Access

- From your perspective, what are the biggest challenges students face when accessing university information and services?
- Which types of announcements are most critical for students to receive on time?
- What limitations do you see in current communication channels such as WhatsApp groups, emails, and noticeboards?
- Would a centralized official platform help reduce misinformation among students?

B. Student Welfare & Well-being

- What are the most common welfare issues reported to your office?
- Do students clearly understand where to seek help for mental health or personal challenges?
- How could digital tools improve access to student support services?
- Are there services that should remain confidential or restricted digitally?

C. Emergency & Safety Communication

- How are emergencies currently communicated to students?
- What challenges exist for new students during emergencies?
- Would an in-app emergency alert system be beneficial?
- What controls would be necessary to prevent misuse?

D. Student Engagement & Campus Life

- How does your office coordinate with student clubs and organizations?
- What challenges do students face in participating in campus activities?
- Would a centralized events and clubs platform improve engagement?
- Should student activities require verification by your office?

E. Governance, Feedback & Policy

- How does your office collect feedback from students?
- What challenges exist in ensuring student feedback is constructive?
- Would digital feedback tools support better decision-making?
- How important is transparency after feedback is collected?

F. System Access, Privacy & Adoption

- What data privacy concerns should be prioritized?
- Should different student categories have different access levels?
- What factors would influence official adoption of a mobile application?
- What would define success for such a platform from your perspective?
